

METROPOLIS CLINICAL LABORATORIES — DIAGNOSTIC REPORT

Comprehensive Metabolic Panel (CMP) & Renal Function Test

PATIENT DETAILS

Patient Name:	John Doe
Sample Collection:	19 September 2026, 08:30 AM (Fasting)
Ordering Physician:	Dr. Robert Vance, MD
Report Status:	FINAL / VERIFIED

BIOCHEMISTRY & RENAL PANEL

Serum Creatinine:	1.4 mg/dL [HIGH] (Reference: 0.7 - 1.2 mg/dL)
Blood Urea Nitrogen (BUN):	24 mg/dL [HIGH] (Reference: 7 - 20 mg/dL)
eGFR (CKD-EPI):	54 mL/min/1.73m2 [LOW] (Reference: > 60 mL/min)
Serum Potassium (K+):	5.4 mmol/L [HIGH] (Reference: 3.5 - 5.0 mmol/L)
Serum Sodium (Na+):	139 mmol/L [NORMAL] (Reference: 136 - 145 mmol/L)
Fasting Blood Glucose:	142 mg/dL [HIGH] (Reference: 70 - 99 mg/dL)
HbA1c (Glycated Hb):	7.4 % [HIGH] (Reference: 4.0 - 5.6 %)
Serum Total Cholesterol:	210 mg/dL [HIGH] (Reference: < 200 mg/dL)

LABORATORY CLINICAL INTERPRETATION NOTES

Elevated Serum Creatinine (1.4 mg/dL) and mild hyperkalemia (5.4 mmol/L) noted.
Correlate with concurrent ACE-inhibitor (Ramipril) and repeat renal panel in 5-7 days.
Fasting blood sugar and HbA1c indicative of suboptimally controlled Type 2 Diabetes.
